

JANCIK ARTS INTERNATIONAL, INC.
CUSTOM CRAFTED SCREENS

JAI SAMPLE
CCS
SHEET NO. 113

JANCIK ARTS INTERNATIONAL offers unique custom designed screens that merge metal frames with art glass beautifully.

Note in the picture below the decorative art glass and metal signage screens in Chef Curtis Stone's signature SHARE restaurants aboard the Ruby Princess and Emerald Princess revits. The screens are eight feet tall and span five panels wide.

Given a tight deadline and a limited budget, we simplified Jeffrey Beers International's original concept to stay within the project's specific parameters without sacrificing the design intent. Because weight was a consideration, an aluminum framework was utilized and completed with a blackened steel finish.

The result is a stunning wall of shape and texture.

Because the constant microvibrations on a cruise ship can lead to wear and tear on the glass, each piece was secured within the frame using proprietary techniques to avoid rattling and potential breakage. The revitalization of a cruise ship usually lasts only a few weeks, so every minute saved during installation is instrumental in delivering a ship on time. To this end, we engineered mounting brackets to assist the contractors with a safe and speedy installation.

We are master craftsmen with more than 36 years of experience in art glass (including cast, stained, carved glass, antique mirrors, etc.) and art metal (railings, grilles, doors, gates, light fixtures, and sculptures) in residential, hospitality, and worship spaces.
