JANCIK ARTS INTERNATIONAL can produce elements such as Cast, Carved, and Fire-Polished Glass that can enhance your space with simple or complex detail.

**Fire-Polished Glass**

Another visually similar product is our new line of Fire-Polished Glass. Unlike Cast Glass, this technique is not dependent upon molds, thereby greatly expanding the design possibilities.

**Cast Glass**

Cast Glass, more correctly called Slumped Glass, is sculptural in nature and a popular choice for those who desire dimensional glass void of color.

**Carved Glass**

Carved Glass offers the most flexibility when it comes to detail work. Designs are crisp and the multi-layer approach allows depth and intricate detail where needed.

We are master craftsmen with more than 36 years of experience in art glass (including cast, stained, carved glass, antique mirrors, etc.) and art metal (railings, grilles, doors, gates, light fixtures, and sculptures) in residential, hospitality, and worship spaces.
